Base map information shown on this FIRM was derived from multiple sources. This information was photogrammetrically compiled at a scale of 1"=400' from aerial photography dated 2017.

In cooperation with the Federal Emergency Management Agency (FEMA) and local communities in Alabama, the Flood Insurance Rate Map (FIRM) was developed by the Alabama Office of Water Resources in a digital statewide format to assist communities in their efforts to minimize the loss of property and life through effectively managing development in flood-prone areas. The State of Alabama has implemented a long term approach to floodplain management to reduce the impacts of flooding. This is demonstrated by the State's commitment to mapping floodplain areas at the local level. As part of this effort, the Alabama Office of Water Resources is working closely with FEMA as a Cooperating Technical Partner to produce and maintain this digital FIRM.
