Base map information shown on this FIRM was provided in digital format by the Federal Emergency Management Agency and the Mississippi Automated Resource Information System (MARIS). Ortho imagery was produced by Surteck Corporation for the State of Mississippi and flown in 2014 with a 1-foot ground sample distance.

This map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and FDTs may reflect stream channel distances that differ from what is shown on the map.

This map was produced through the Mississippi Risk MAP Program, a cooperative partnership between the State of Mississippi and the Department of Homeland Security, Federal Emergency Management Agency.
